

## Hydrant Collar Instructions

**Step 1:** Start set screw in clip (**Figure A**). Place clip on Collar near hole making sure flared side of clip and screw is facing out (**Figure B**).

**Step 2:** While holding clip & Collar in one hand, take opposite end of Collar and wrap around hydrant between flange and ports.

**Step 3:** Insert end (*without clip*) behind Collar and through clip (**Figure C**).

**Step 4:** Snug up Collar around hydrant.

**Step 5:** With 1/8" allen wrench (*not provided*) tighten screw making sure screw goes through the hole (**Figure D**).

**Step 6:** Make sure that screw is tight so collar will not come undone (**Figure E**).
