

## Sequentially Numbered Hydrant Tags

*RoDon offers municipalities a versatile, practical solution to water distribution system asset tracking and management. The steel bracket tags are exceptionally durable and are designed to provide quick and easy identification of hydrant locations from year to year, through all types of weather.*

*These heavy duty sequentially numbered tags can also be part of a municipality's vulnerability assessment program and to help ensure compliance with the Safe Drinking Water Act of 2008 (Title IV of the Public Health Service Act).*
